- Ability to Personalise ones Web Page; message, picture gallery, blog, and video
- Automated Email Confirmation for registrations and donations
- Automated Tax Receipts for Donations
- Feedback from Donors / Sponsors appears on Personal Pages
- Management of Events and Challenges (both formal and informal)
- Integrated Online Payment Gateway
- Management of Authorised Transactions
- Management and Screening of Supporter's Personal Pages
- Fully integrated with thankQ BackOffice Web Holding pens for authorised information

Content Managed via thankQ

thankQ BackOffice provides content management of the community web site that enables information entered into the thankQ Community screens to be selectively published. This means the user is able to completely manage the entire site directly from thankQ.

Secure SSL Encrypted Processing

The necessary thankQ eCommunity web pages operate in a Secure SSL Encrypted environment. thankQ integrates a secure online payment gateway via recognised suppliers such as PayPal's Verisign gateway. This assures your clients of safe conventional transacting.

BackOffice Processing

All information received via the web site automatically is directed to the appropriate area in thankQ. These include supporter registrations, sponsor / donor payments, personal messages and targets, along with the choice of picture(s), video(s) and the progress-thermometer wanted for a person's page.

When a sponsor's donation has been successfully processed, the sponsor is issued with an on screen Tax Invoice / Receipt (which is also automatically emailed to them). All of the completed information automatically arrives in the thankQ BackOffice Holding Pen.
